- Developed two projects from scratch: quiz application and doctor appointment application.
- Worked on webinarxhoj: a website where you can post a webinar, set reminders and join relevant webinars.
- Technologies:- React, GraphQL, apollo client, NodeJS, MySQL, MongoDB, TypeScript, HTML, CSS.

## PROJECTS

### MBILL APP

REACT NATIVE, NODEJS, MYSQL

A billing app where you can create invoices, manage EMI detail's etc. I have worked on new subscription feature, dividing features a user can use on the basis of subscription, integrated payment gateway, optimized file uploading.

### MOVIES APP

REACT NATIVE

This is a movies application where you can search and watch movies. Movies' data is fetched from TMDB and downloading links are scraped using torrent Scrapper. There's also a Torrent Stream Server for streaming the movies using magnet URL so that you can watch movies in the app itself.

## **TORRENT DATA SCRAPER**

NODEJS, PUPPETEER

This is a Scraper which scrape movies downloading links from torrent sites.

## **JOB RECRUITMENT PORTAL**

REACT, NODEJS, MYSQL, HTML, CSS

This Job Portal enables an employer to post a job and can view information of enrolled job seekers, shortlist candidates for an interview and select best candidates.
